

# INFRASTRUCTURE

## FACILITIES

### 1. Science Lab

Science lab is an excellent place , where student develop their scientific attitude and analytical skills among the students. Science allow students to explore their world and discover new things. Science is an important part of the foundation for education for all learners. Science is an active subject , containing activities such as lands on labs and experiments.

## 2. Library

Library is a place, where we can improve our knowledge. An imaginative and well planned library service is one of the distinctive features of the school. The library is a collection of selected books and encyclopedias to cater to the needs of children at various stages of their emotional and intellectual development. Each child has granted to issue books as per his/her interest to improve the areas of knowledge.

### 3. Music Room

Music is a blessing for us. It refreshes the mind and soul which are important for growth of an individual.

The exposure of young children to a variety of musical instruments, choral arrangements and styles of music help enhance their educational and foster their academic, social and emotional growth.

### 4. Sports Room

Sports is definitely one of the greatest thing, man has ever created. It is quite beneficial for children too.

In our sports room, the students learn more about physical fitness. They perform various activities related to sports. We are providing the facility of regular sports activities, which are skates, football, judo, Basketball. These all are going to perform in the directions and guide lines of trained coaches.
